

Test Plan

1. Introduction

MoMo is a digital financial application that provides users with various financial and payment services, including money transfers, account top-ups, savings, bill payments, mobile top-ups, movie ticket purchases, and expense management.

2. Test Objectives

- Verify bank transactions functionality, including bank transfers/withdrawals, and deposits/top-ups.
- Verify QA payments functionality, including money transfers and payment via QA code.
- Verify bill payments functionality, including payment of utility and other bills.
- Verify mobile top-up functionality, including mobile phone credit and data top-up.
- Verify entertainment and ticketing functionality, including movies ticket purchases.
- Verify expense management functionality, including tracking and managing personal expenses.
- Verify buy now and pay later functionality, including management and use of the MoMo pay later service.
- Verify mobile data functionality, including purchases of 4G/5G data packages.

3. Test Scope

3.1 In Scope

- Function Testing
- UI Testing
- Negative Testing
- Validation Testing

3.2 Out of Scope

- Performance Testing
- Localization Testing
- Database Testing
- Accessibility Testing
- Usability Testing
- Compatibility Testing
- Security Testing
- Automation Testing
- Installation Testing

4. Test Strategy

Testing Type	Description
Function Testing	Verify that the main functions and features work according to their intended behavior.
UI Testing	Verify the user interface and visual elements of the application.

Negative Testing	Verify the application's behavior when invalid, incorrect, or unexpected inputs are provided.
Validation Testing	Verify input fields, data formats, required fields, and validation rules.

5. Test Environment

Item	Value
Application	MoMo
URL	None
Testing Tool	MoMo application/ Excel/ Word
Operating System	Windows 11
Browser	Google Chrome (Latest Version)
Device	Desktop/Laptop

6. Entry Criteria

The test environment is available and accessible.

The application is deployed and ready for testing.

Test requirements and main functionalities have been identified.

Test cases and test data are prepared.

Required user accounts and access permissions are available.

7. Exit Criteria

All planned test cases have been executed.

All critical and high-priority defects have been fixed and verified.

Test results have been documented.

No unresolved critical defects remain.

The final test summary report has been completed.
